Summary

As a seasoned software engineer with 4 years of experience, I bring a wealth of knowledge and expertise in various programming languages such as PHP, Node.js, and TypeScript. My proficiency in NoSQL and MySQL databases has allowed me to create efficient and scalable solutions for various projects.

I possess strong problem-solving skills and have a track record of delivering high-quality code within tight deadlines. With a passion for clean and maintainable code, I prioritize readability and ease of maintenance in all my projects.

My experience working in cross-functional teams has equipped me with excellent communication and collaboration skills. I am always eager to learn and improve my skills, staying up-to-date with the latest industry trends and advancements.

Experience

Full Stack Engineer
skydesk inc

Sep 2021 - Present (1 year 6 months)

• Developed and maintained fullstack solutions using Nest.js and TypeScript for various web applications and services.

• Utilized TypeORM and Sequelize for database migration and schema building, and implemented test-driven development using Jest for quality assurance.

• Designed and implemented RESTful APIs using Nest.js and worked closely with cross-functional teams to ensure seamless integration with the frontend.

• Developed and maintained client-side applications using React and React Native, implementing modern frontend frameworks and libraries.

• Designed and implemented responsive and user-friendly interfaces using modern front-end frameworks and libraries.

• Debugged and resolved complex issues related to performance, scalability, and security of the fullstack systems and client-side applications.

• Participated in code reviews, wrote and maintained unit and integration tests to ensure the quality and stability of the codebase.

• Contributed to the improvement of the team's development processes, by proposing and implementing best practices, tools, and methodologies.

Skills : typescript, typeorm, nest js, sequelize, react, react native, aws

Full Stack Engineer
wireless consultancy

May 2020 - Jun 2021 (1 year 2 months)

• Developed and maintained fullstack solutions using TypeScript and Node.js for various web applications and services.

• Utilized Knex.js for database migration and schema building, and implemented test-driven development using Jest for quality assurance.
• Designed and implemented RESTful APIs using Express.js and worked closely with cross-functional teams to ensure seamless integration with the frontend.
• Developed and maintained client-side applications using React and React Native, implementing modern frontend frameworks and libraries.
• Designed and implemented responsive and user-friendly interfaces using modern front-end frameworks and libraries.
• Debugged and resolved complex issues related to performance, scalability, and security of the fullstack systems and client-side applications.
• Participated in code reviews, wrote and maintained unit and integration tests to ensure the quality and stability of the codebase.
• Contributed to the improvement of the team's development processes, by proposing and implementing best practices, tools, and methodologies.

Skills : typescript, node js, knex js, react, react native

Software Engineer
Durmazz technology
Apr 2018 - Mar 2020 (2 years)
• Developed and maintained backend solutions using PHP and Node.js for various web applications and services.
• Built RESTful APIs using Express.js, and designed and implemented database schemas using MongoDB and Mongoose ORM.
• Worked closely with cross-functional teams to ensure seamless integration of the backend with the frontend.
• Debugged and resolved complex issues related to performance, scalability, and security of the backend systems.
• Participated in code reviews, wrote and maintained unit and integration tests to ensure the quality and stability of the codebase.
• Contributed to the improvement of the team's development processes, by proposing and implementing best practices, tools, and methodologies.

Key Achievements:

• Successfully built and launched a scalable API service for a high-traffic web application, which resulted in a 20% increase in user engagement.
• Optimized the database schema and queries for an e-commerce platform, reducing the average response time of the API by 50%.
• Led the development of a custom CMS solution for a client, which resulted in a 40% reduction in development time and costs.

Education

Eastern Mediterranean University
Bachelor's degree, Information Technology
Sep 2019 - May 2023

Skills

Information Technology • TypeScript • Node.js • PHP • Laravel • MongoDB • Knex.js • MySQL • SQL • Amazon Web Services (AWS)
